

Car Magnet

Care Sheet

A Simple Guide to Applying & Taking Care of Your Vehicle Magnet

The surface of the vehicle & surface of the magnet must be clean and dry.

Apply magnetic sheet directly to the vehicle. Do not pull magnet to reposition

Ensure magnet is applied to a smooth and flat surface, avoiding any bumps or groves

Incorrect

Correct

The magnetic sheet must be removed from the vehicle twice per week, making sure both magnet and vehicle are wiped free of moisture and dirt. To clean use a soft cloth, warm water and detergent.

Never use chemical cleaners, brushes or high pressure cleaners on the magnet as it could damage the print.

The magnetic sheet should be kept flat when not in use, to avoid any damage which may reduce it's adhesion to your vehicle. Do not set any objects on top of the magnetic sheet that might damage the surface.
